Somashekhar S. Anad

Application Engineer · Industrial IoT & Automation · ABB Certified ReliaQuote Small Project Specialist
+91 95915 57311 | +91 76193 60105 | somashekhar.s.anad@gmail.com | Karnataka, India

SUMMARY

Automation and Industrial IoT engineer with 3+ years across ABB Edgenius IoT, Symphony Plus and 800xA. I configure, test and validate secure edge-to-cloud data flows over OPC UA, Modbus and PubSub, and have delivered Symphony Plus upgrades and commissioning at major NTPC and JSW power stations.

CERTIFICATION

ABB ReliaQuote Small Project Specialist · ABB, verified via Credly
Verify: https://www.credly.com/badges/55aab926-018b-4b22-8e56-af446c737d95
Addenda & Revision Tracking, Bidding, Bill of Materials (BOM) Optimization, Blueprint & Plan Analysis, Circuit Breakers, Circuit Protection, Configuration Management, Construction Accounting, Contractor Management, Digital Project Estimation Programs, Division 26 Mastery, Electrical Engineering, Electrical Load Management, Electrical Maintenance, Electrical Networks, Electrical Systems, Engineering, Engineering Drawing, Fault Management, Interrupt Ratings & Coordination, Modular Metering, NEMA enclosed Control Solutions, Power Distribution Equipment, Procurement, Project Delivery, Project Engineering, Project Implementation, Project Management, Project Management Life Cycle, Safety Management Systems, Safety Switches, Safety Techniques, Sales Pipeline Management, SalesForce CRM, Subcontracting, Switchgear, Take-Off Proficiency, Technical Sales Consultation, Technical Specification Interpretation, Transformer application, Value Engineering (VE), electrical distribution basics, power configuration

EXPERIENCE

Application Engineer (TPC) – ABB Global – Edgenius IoT, Software Testing Team via Axcend Automation Pvt. Ltd. · Current

- Configure, deploy and test Local Managed Servers (LMS) for edge data connectivity
- Implement Connect on Demand (COD) for secure, on-demand cloud access to distributed automation assets
- Simulate, test and validate complex channel flows on ABB 800xA SCADA/DCS
- Validate Symphony Plus real-time system and IoT gateway interoperability
- Configure OPC UA client/server and Modbus for legacy and modern device communication
- Integrate Field Information Manager (FIM), PubSub and SCADA Data Gateway for event-driven data routing
- Commission and validate AC500 PLC controllers
- Write and run end-to-end test cases for multi-protocol secure data flows; root cause analysis and bug reporting to R&D
- Prepare compliance checklists and detailed test reports
- Work with teams in Germany and India; support CI/CD pipelines for rapid firmware/software deployment

Automation Engineer – ABB TPC via Aideas Engineering Pvt. Ltd. · Previous

- Hardware configuration and firmware upgrades for IET800, HC800, CP800 and NTCL C-Net Loop
- Installed, configured and commissioned Symphony Plus Engineering, History and Operation Servers
- Managed tag, alarm, event, external tag, calculation, trend and user-role databases
- Built graphics, faceplates, scripts and symbols; set up redundant server peering and reports
- Delivered complete engineering upgrades for NTPC Barh, Vindhyanachal, Kahalgaon, Singrauli and Farakka
- HMI upgrades and Symphony Plus version migrations
- Commissioned JSW Bharat units with Symphony Plus software and SD controllers
- I/O configuration, panel wiring and control circuit design in AutoCAD

Automation Engineer – Creative Automation & Controls · 6 months

- Waste-level management automation for the sugar industry
- Allen Bradley CompactLogix 5370 programming in LAD and FBD
- SCADA in FactoryTalk View and HMI on PanelView 700
- Control hardware design and wiring with sensors, pneumatics and relays

Intern – Just Engineering, Pune · 6 months

- P&ID design and electrical drawings
- PLC, HMI and SCADA programming; system commissioning

KEY PROJECTS

Edgenius LMS & Connect on Demand Validation: End-to-end validation of secure edge-to-cloud connectivity for distributed automation assets.
800xA & Symphony Plus IoT Interoperability: Validated channel flows between ABB DCS platforms, IoT gateways and field controllers.
NTPC Symphony Plus Engineering Upgrades: Complete engineering upgrades for NTPC Barh, Vindhyanachal, Kahalgaon, Singrauli and Farakka.
JSW Bharat Unit Commissioning: Commissioned JSW Bharat units on Symphony Plus with SD-series controllers.
Sugar Industry Waste Level Management: PLC-based process automation for waste-level management.
Temperature & Level PID Process Control: Closed-loop PID control of temperature and level, with process simulation and security features.
Industrial Real-Time Simulator Integration: PLC programs for conveyor, robotics, automated warehouse and sorting machine simulations.
MCC & PLC Panel Design: Control panel design from component selection through testing and commissioning.

SKILLS

ABB Platforms: Symphony Plus, Edgenius IoT, ABB 800xA, FIM / SCADA Data Gateway, AC500 PLC
Protocols: OPC UA, Modbus, PubSub, Ethernet/IP, Fieldbus
PLC & SCADA: Rockwell RSLogix 500/5000, FactoryTalk View, Siemens TIA Portal / Simatic, Siemens WinCC, Mitsubishi GX Works 2
Engineering & Testing: Firmware upgrade & commissioning, Test design & RCA, Compliance documentation, Panel design (AutoCAD), CI/CD support

EDUCATION

B.E. Electronics & Instrumentation Engineering, Basaveshwar Engineering College, Bagalkot (VTU) (2022)
PUC – Science, Sri Chaitanya PU College, Bangalore (2017)
Class 10 (CBSE), Basaveshwar International Public School, Bagalkot (2015)
